

## Cannot send email

Check setup

Verio (Outlook Express)

1. In Outlook Express, select Tools > Accounts.
2. In Internet Accounts, Click tab **mail** select account that you want to setup > then select Properties
3. Go to tab Server

4. Checking

**-Incoming mail (POP 3 ,IMAP or HTTP ) server :**

Should be: [yourdomainname.com](#)

**-Outgoing mail (SMTP) server :**

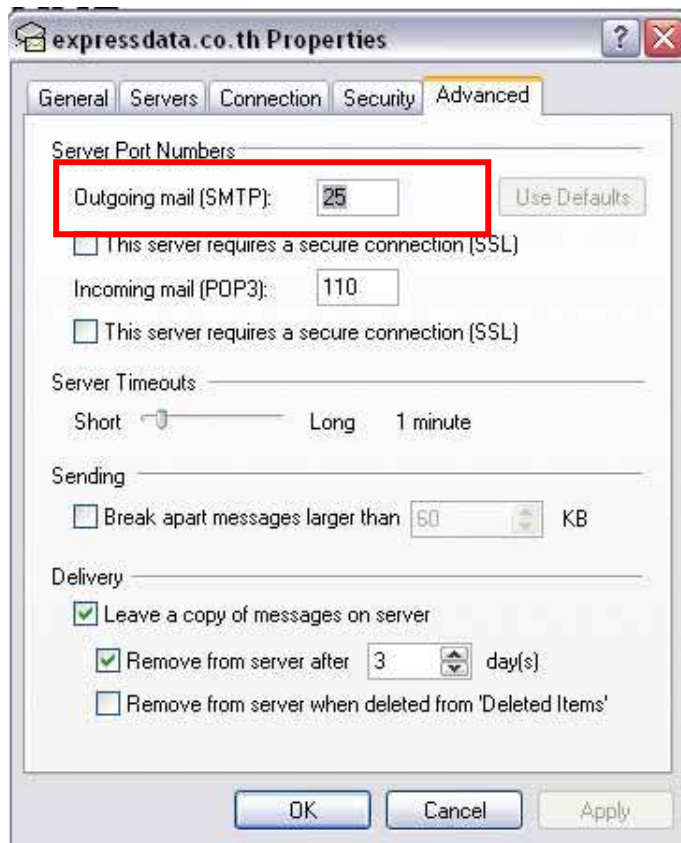

Should be: [yourdomainname.com](#)

**-Account name:** Should be your email account (Make sure that have @your domain name)

**-Password:** Confirm your password

**-Check the box that said "My server requires authentication"**

5. Go to tab Advance

- Verify that you have 25 for your Outgoing mail (SMTP)
- If used port 25 and still have problem, change port to 26
