

Setting up IMAP on your iPad

First time setting up email on an iPad

1. Open Mail on your iPad:

2. Select Other:

3. Enter your email information:

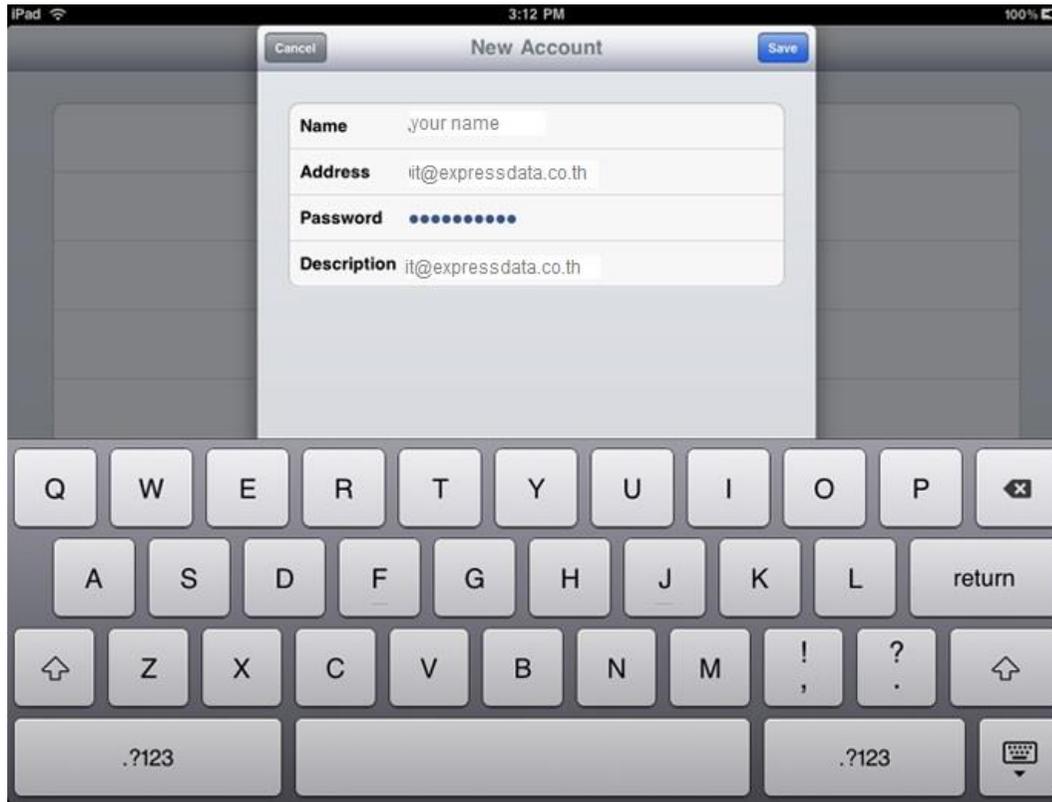

Name: Use your name.

Address: it@expressdata.co.th (your e-mail)

Password: xxxxxx

Description: This will auto-fill with your address.

Once you have entered your information, press the **"Save"** button.

Enter the Mail Server information:

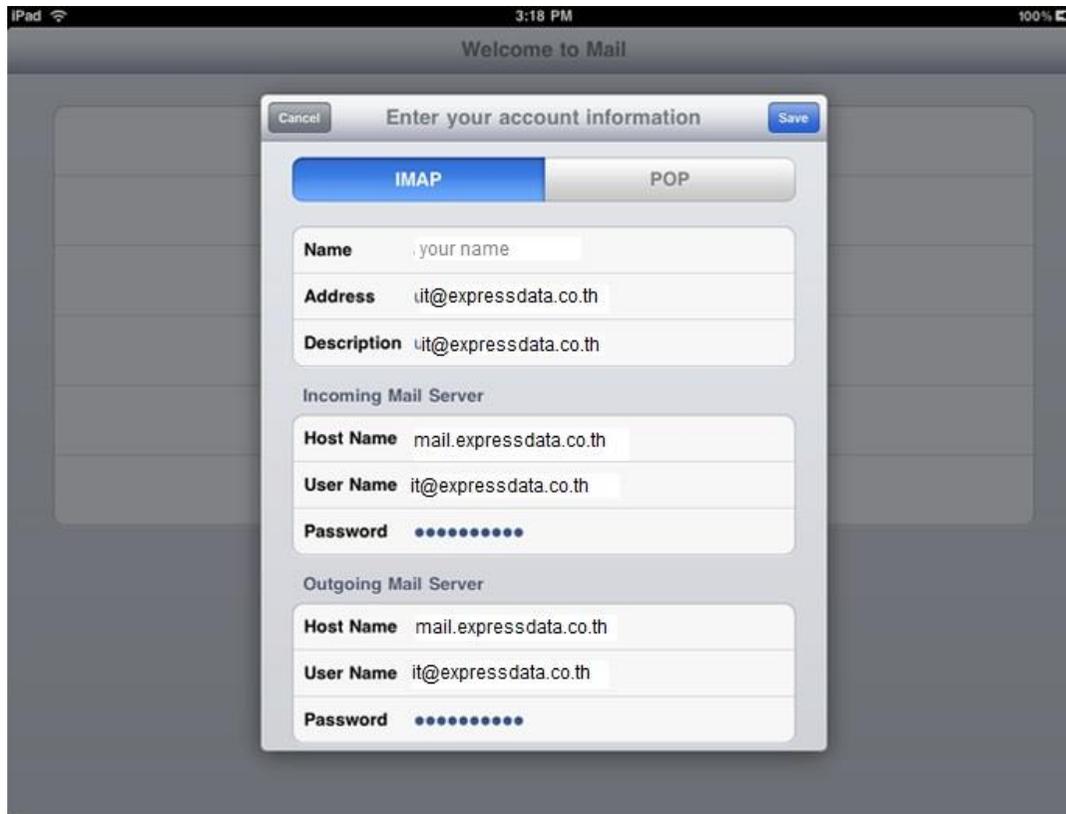

Use the following for both the Incoming and Outgoing Mail Server

Host Name: mail.expressdata.co.th (mail."your domain mame)

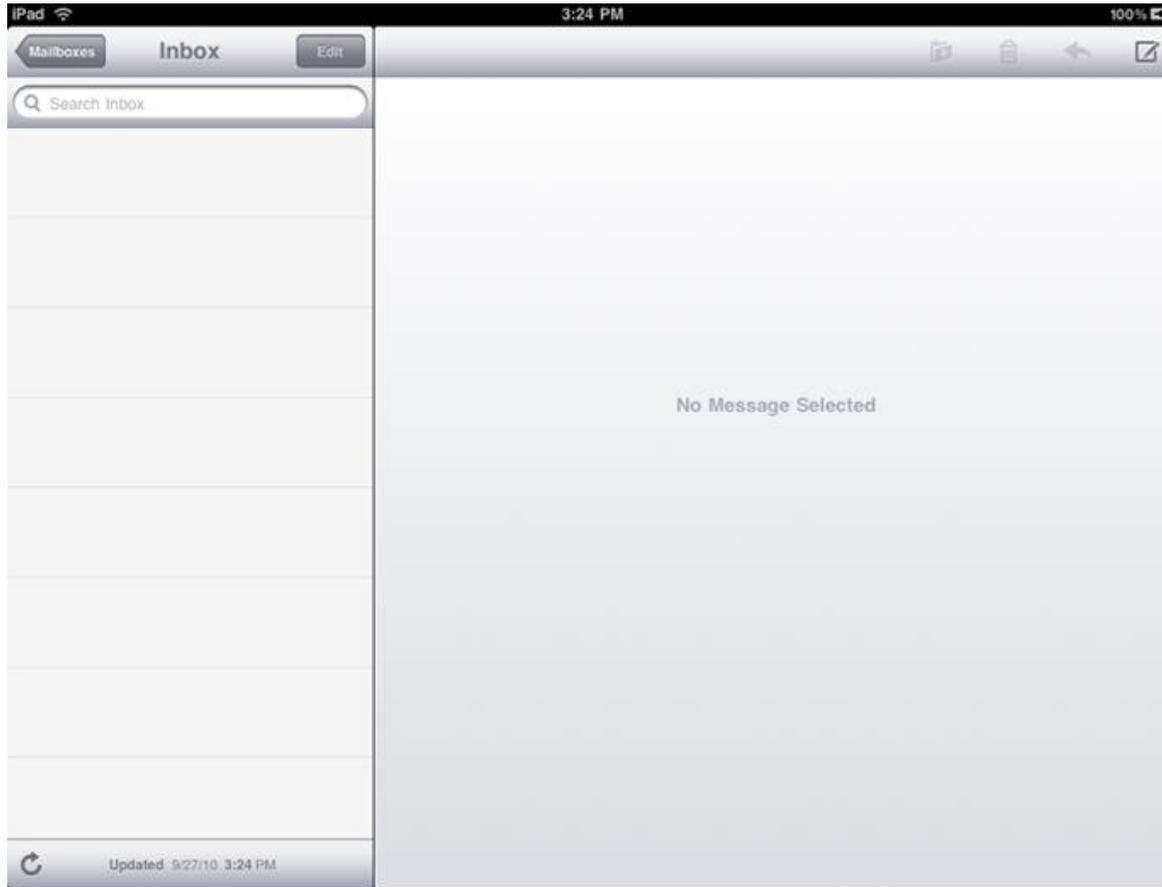

User Name: it@expressdata.co.th (your e-mail)

Password: xxxxxx

Once you have entered your information, press the **"Save"** button.

4. We recommend you disable SSL only Outgoing Mail Server (SMTP) → Select “YSE”.
5. Once the account is successfully added, you are taken to the inbox:

Check SMTP settings

1. Tap Settings > Mail, Contacts, Calendars. Under Accounts, tap the account from which you're trying to send mail.
2. Under Outgoing Mail Server, tap SMTP.
3. Tap the SMTP server for your email account and verify the settings are correct.

Primary Server : mail.patong-see2sea.com → ON

Outgoing Mail Server : Use SSL → OFF

Authentication → Password

4. If you have multiple email accounts on iPad, try using an SMTP server from another account. Tap the SMTP account and Select "ON" on the On/Off slider.
5. Under Outgoing Mail Server, tap Advanced > Incoming Settings select "ON" for the Use SSL > Authentication → Password

Adding an additional email account to your iPad

1. Tap Settings.
2. Then tap Mail, Contacts, Calendars.
3. Next, tap Add Account.
4. Select Other.
5. Enter your email information.
 - Name: Your full name as you would like it to appear.
 - Address: Your full email address.
 - Password: Your password for this email address.
 - Description: By default, your domain name will be used. You can also use work, personal, home.
6. Click the Save button to continue.
